

Report Writer

Objective

To fulfill your unique reporting requirements by allowing creation of additional custom reports without any programming skills.

The Value of Report Writer

- Quickly and easily produce custom reports
- Click-and-go reporting via the report wizard
- Intuitive interface enables design by non-programmers
- Flexible reporting with run-time prompts
- Built-in data dictionary
- Easy integration to third-party sources
- Export data in multiple formats for third party use
- Daisy-chain reports for management packs
- Multi-level security for sensitive reports and data
- Secured update function

Matching Report Writer to your business

- Custom report formatting to suit your company standards
- Bitmap backgrounds provide watermarks and company logos
- Report in default sequence or define up to 10 levels of custom sorting
- Flexible selection criteria based on run-time prompts
- Run-time selection of Summary or Detail reporting
- XML Output:
 - XML Output wizard guides you through publishing options
 - Customizable stylesheets for company themes or plain XML
 - Sophisticated layout control
 - Summary reports can drill down to detail
 - Automatic publishing to Intranet and Internet available
- Security:
 - Define Password and Operator/Group level security per report
 - Protect report creation and execution
 - Password protect specific tables
 - Globally restrict access to Tables and Columns
- Standard linkages for easy reporting across multiple tables
- Export report definitions between locations
- Provide instruction with report narrations
- Zero programming skills required

Processing

- Top X reporting allows reports such as top 20 selling items
- Grand totals and up to 5 levels of subtotals per report
- Up to 100 user-defined variables per report
- Run-time prompts and check boxes provide great flexibility
- Sophisticated conditional printing and positioning
- Simple to use click and edit interface with preview
- Arithmetic calculations including power and square roots
- Powerful include and exclude logic with multiple level AND/OR logic

Integration

- Built-in access to data from all SYSPRO modules
- Support for SQL Server and ISAM sources
- Publish XML reports to Intranet/Internet systems
- Output results for use in MS Excel

The image displays three overlapping windows from the SYSPRO Report Writer application:

- Report Writer XML Report Viewer:** Shows a report titled 'Inventory Valuation Report' for 'The OUTDOORS Company' prepared on 04/07/2008 15:08. It displays a table with columns: Stock code, Description, Supplier Product class, Stock uom, Cost uom, Cycle uom, Wh bin, Default bin, Qty on hand, Unit cost, Value, and Total mass. A subtotal for stock code A100 is shown with a value of 37444.000.
- Inventory Valuation Report - Microsoft Internet Explorer:** Shows a detailed view of the report for stock code A101, listing items like '15 Speed Mountain Bike Boys' with their respective quantities and values.
- Report : INVP25 - Inventory Valuation Report (Inventory Master):** Shows the report configuration options. The 'Options' pane includes settings for Title, Output (XML), Messages, Internet, Overline/underline, Column headings, Formal headings, Truncate user-defined column headings, Report width (132), Lines per page (58), Bitmap, Leading zeros, Suppress blank lines, and Suppress blank lines in totals.
